- fixed width: 3.50 m
- projection 3.40 / 3.85 / 4.30 / 4.75 m
- fixed height: 2.665 m
- clearance height 2.50 m
- lamella rotation range 0° to ~120°
- water drainage side to closed support column chamber
- available in 5 popular structural colours

The SB350 aluminium freestanding pergola allows you to create a comfortable relaxation and meeting space for family and friends, equipped with an adjustable roof. The ability to remotely rotate the lamellas means its users can enjoy precisely the amount of sun they desire.

The SB350 pergola is a standardized basic structure, refined in every detail, which stands out in the market for its exceptionally affordable price.

Why you should recommend the SB350 pergola:

- it's a comfortable recreational space ready for use immediately after installation, requiring no additional actions from the user
- Sunbreaker system lamellas allow precise adjustment of the amount of sun and can close completely, creating a uniform, shading roof
- it has an electric motor controlled by a remote or phone app, meaning the amount of sun can be controlled from an armchair with a single finger

Choose the SB350 pergola if your client:

- is looking for a quick and easy way to create a functional and durable recreational space that requires minimum maintenance
- expects effective water drainage in their desired direction, which the SB350 guarantees with the option to block drainage in selected columns
- counts on an attractive price, achieved through production standardization, not compromises on quality

Learn more about the SB350 pergola:

- Requires a load-bearing subfloor
- Column profile 130 x 130 mm
- Blade spacing 150 mm
- Drainage to all columns (possibility to block 1 drain in the gutter)
