

SDZ

- ✓ curtain type: aluminum filled with polyurethane foam or PVC
- ✓ aluminum guides
- ✓ system of self-supporting shutters
- ✓ simple and quick installation
- ✓ shaft position adjustment allows it to be adapted to many types of boxes

The SDZ system is an ideal solution for the renovation of existing buildings, when there is a need to replace the old roller shutters with the use of lintel boxes. The design of this system allows for quick and trouble-free installation on existing surfaces. SDZ shutters can be controlled manually with a belt retractor, a crank mechanism, as well as electrically.
