

Exakt XT

- ✓ box shape: rectangular
- ✓ PVC box (optional external aluminum front plate)
- ✓ curtain type: aluminum filled with polyurethane foam or PVC
- ✓ inspection flap from the forehead
- ✓ PVC and aluminum guides

The box can be covered with plaster on the outside.

The Exakt XT top-mounted roller shutter is a modern version of the highly valued and very popular Exakt system, which, thanks to the use of static brackets, can now utilise boxes up to 5,900 mm wide. The new, more robust construction also means the availability of heavier curtains, including the PA52 aluminium solution, which is frequently chosen by customers.

By choosing Exakt XT top-mounted roller shutters, the customer invests in warmth and quiet, achieved through their airtight design and the thermal insert inside the box. For the installer, in turn, it is a well-known product with no surprises, featuring standardised guide rails they already know from, among others, the [Expert XT](#), [Exte Neo XT](#) and [Elite XT](#) roller shutters. Additionally, convenient front access facilitates any maintenance work.
