

Jolly

- ✓ Frame: extruded aluminium
- ✓ Mesh: fibreglass / PVC (standard)
- ✓ Mesh colour: black or grey
- ✓ Width: up to 1600 mm*
- ✓ Height: from 1400 to 2800 mm*
- ✓ Profiles painted in selected RAL colours or covered with chosen wood-like veneers

The Jolly sliding roll-up mosquito net is recommended for windows and terrace doors. Its opening and closing from the outside and inside is facilitated by a special handle running along the whole height of the profile. Jolly is also fitted with caterpillar tracks that retract into the side profile to seal and stabilise the net.

The floor rail of this mosquito net is only 5 mm high, and it opens and closes smoothly despite the use of springs that roll up the mesh. These qualities make it very suitable for heavily used areas.

Installing the Jolly mosquito net in the guides is quick and easy due to bayonet clips. Mounting the mosquito net is done with a "click", and its removal only requires releasing the package from the clips. It is one of the most convenient solutions on the market.

*the height of the mosquito net must be greater than its width
