1.5

Uw when Ug = 0.6

2-3

Guiding Rails

One of the most modern solutions in the field of doors and window joinery. Tilt and slide doors based on the MB-59 HS system can successfully replace traditional balcony windows. The system creates enormous design possibilities and gives an unusual appearance - both to the interior and the entire facade.

Uw = 1.5 W/(m²K)* when using the 4one / 14 Ar / 4/14 Ar / 4one package – Ug = 0.6 W/(m²K), argon-filled, with an aluminum frame.

* Coefficient calculated for a door with dimensions 4000 x 2200 mm.
