

PG/SZ

- ✓ Frame: extruded aluminium profile
- ✓ Coating: powder varnish in any colour from the RAL palette
- ✓ Mesh: PVC coated fibreglass in black or grey colour
- ✓ Installation: external, using non-invasive hooks-plates and durable gaskets
- ✓ Max dimensions without a crossbar: 1200 × 1200 mm
- ✓ Max dimensions with a crossbar: 1300 × 2300 mm

The PG/SZ mosquito net is designed for Aluplast and Salamander systems, inserted into the window from the outside. It is fixed with simple thin brackets, which effectively prevent it from shifting.

The PG/SZ mosquito net has a 5x7 brush seal and two handles on the right and left side for easy attachment and removal.

As standard, the PG/SZ is equipped with the tried and tested hooks of the MRS mosquito net, two in each corner. Additional hooks or springs can be useful in larger mosquito nets with longer profiles.
