

Prime Flat

- ✓ Frame made of extruded aluminum
- ✓ Coated with RAL color lacquer
- ✓ Fiberglass mesh coated with PVC
- ✓ Compatible with top-mounted roller shutters (frame thickness: 10.5 mm)
- ✓ Available meshes: aluminum, anti-smog, and sun-protective

The Prime Flat frame-mounted mosquito net is a simple and convenient way to effectively protect against insects. Its installation and removal require neither specialized technical knowledge nor exceptional manual skills. Thanks to the safe installation system, the risk of window damage is minimal, even for inexperienced users.

Key features of the Prime Flat frame-mounted mosquito net:

- Lightweight and durable frame made of extruded, corrosion-resistant aluminum
- Mechanically durable fiberglass mesh coated with PVC (available in black or gray)
- Compatible with aluminum, PVC, and wooden windows from the Naturo product group

Choose the Prime Flat frame-mounted mosquito net if:

- You value convenient installation from the outside, performed from inside the room using flexible mounting clips that are gentle to window profiles
- You plan to use top-mounted roller shutters and want to ensure the mosquito net is fully compatible with them
- You want to match the frame color of your mosquito net to your windows and façade, using the reliable RAL color palette

Explore the Prime Flat frame-mounted mosquito net:

- Made of extruded aluminum profiles
- Frames with a depth of 10.5 mm and width of 21 mm
- Powder-coated frames in RAL colors

- Installed from the exterior
- Customizable dimensions to meet individual client needs
- Availability of specialized meshes: anti-smog, anti-allergic, classic with enhanced transparency, pet-resistant, and aluminum
