

Sill Plate

Sill Plate: Nyxon

✓ Compression strength up to 87 kg/cm²

✓ Thermal conductivity coefficient: 0.089 W/m²K

✓ Ability to adjust the opening size

✓ Suitable for all types of joinery

This sill plate is a solid and well-insulating solution for the installation of window and door joinery. Made of Nyxon baseboard and hard extruded XPS, it provides stable support and excellent thermal insulation, allowing adjustment to various opening sizes.
