

Sill Plate

Sill Plate: PhonoTherm

- ✓ 100% waterproof
- ✓ Compression strength up to 8.1 MPa
- ✓ Resistant to chemicals and weather conditions
- ✓ Thermal conductivity coefficient: 0.076 W/m²K
- ✓ Easy to process, perfect for drilling and cutting

This material, produced by the German company BOSIG GmbH, is an innovative solution used in window and door sill plates. Made of high-quality polyurethane foams, contains no harmful substances like CFCs, HCFCs, or formaldehyde. Additionally, it is enriched with aluminum particles and meets all building regulations in force in Europe.
