

# Sill Plate

Sill Plate: Stadur

- ✓ Compression strength: > 1000 kg/m.b.
- ✓ Thermal conductivity coefficient: 0.37–0.49 W/m<sup>2</sup>K
- ✓ Excellent thermal insulation, eliminates thermal bridges
- ✓ Weather-resistant and does not decompose
- ✓ Suitable for all types of profile systems

Made of a multi-layer FrameTec board, the Stadur sill plate ensures reliability thanks to its polystyrene foam and durable outer layers. The product is compatible with all profile systems, guaranteeing stable installation and excellent insulating properties.
