**from 0.75**

Uw

The elegant SlimWall 35 facade system offers minimalist aesthetics with parameters suitable for passive houses. It allows you to create huge, two-storey glazing with opening and fixed casements.

## 3 most important features of SlimWall 35:

- Minimalist design with thin, durable mullions
- Hidden drainage that does not break the appearance of the facade
- Excellent thermal parameters, suitable for passive houses

## Choose SlimWall 35 if:

- You want to create an impressive facade with large glazing
- You want to combine the facade with windows and doors from the MasterLine 8 system
- Expect the possibility of opening parts of accommodations for better interior ventilation
