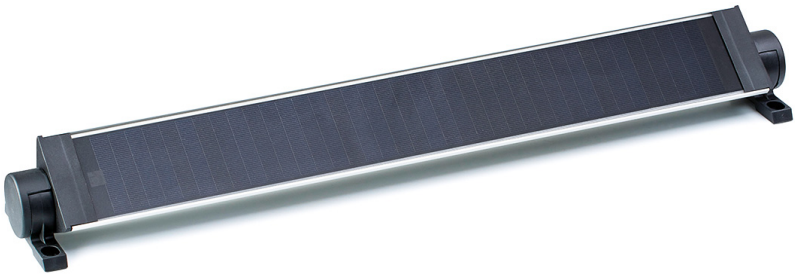
Solar Panel with Battery for JA DC Drives



- manufacturer: Elero
- compatible with JA DC Drives
- integrated Battery
- power supply: 12 V DC
- quickConnect Plug
- battery capacity: 2400 mAh
- safety rating: IP44
- permissible ambient temperature: -20°C to 60°C

The solar panel with an integrated battery is designed to harness solar energy to power the JA DC family of drives. It allows you to break free from the constraints of having to connect window covering drives to the electrical grid and reduces electricity consumption.

3 Key Features of **the Solar Panel**:

- draws energy directly from the sun,
- can be easily positioned at the optimal angle for maximum efficiency,
- Eliminates the need to connect the window covering drive to the electrical grid.

Choose **the Solar Panel** if:

- you want to use your window coverings at all times, even during power outages,
- you prefer to avoid running additional electrical wires required by traditional drives,
- you value simple installation with minimal wall intrusion.
