

Top-Zag

- ✓ Frame: Extruded aluminium
- ✓ Net: fibreglass / PVC (standard)
- ✓ Width: up to 450 cm (up to 800 cm for a pair of doors)
- ✓ Height: up to 300 cm
- ✓ Can be installed in very large openings
- ✓ Specialised nets available
- ✓ Profiles painted in all RAL colours

The Top-Zag mosquito net is designed for very large openings, even up to 800 cm wide, but can also be used for narrower passages. It can be mounted on or in the recess. Large nets over 10 m² require specially reinforced profiles.

The presence of a Zig-Zag mosquito net does not limit the functionality of the door. It uses a sliding profile in which the handle is replaced by a groove. It closes magnetically. The mullion can be dispensed with when installed on a corner window.

The mosquito net profiles can be painted in any RAL colour.
